Objective	Seeking a full-time software engineering position where I can leverage my cybersecurity and systems integration experience to contribute to cutting-edge technology solutions.						
Education	Missouri University of Science and Technology (Missouri S&T) B.S. Computer Science					GPA: 4.0/4.0 May 2025	
Experience	The Cigna Group					St. Louis, MO	
	TECDP Senior Analyst - Cybersecurity Education and Awareness					Jul '25 - Present	
	- Created and fine-tuned phishing campaigns to raise awareness to the entire enterprise numbering 110,000 employees worldwide - Planned and hosted events focused on cybersecurity awareness, encouraging and rewarding employees for following cyber standards and policies - Developed and reviewed cybersecurity trainings based on new and evolving cyber policies and standards - Developer on the TECDP Innovations team, maintaining and developing new systems on the company's TECDPortal application using ReactJS and TypeScript						
	National Geospatial-Intelligence Agency					St. Louis, MO	
	Cyber Security Engineer Intern - Cyber Risk Management Division					May '24 - Aug '24	
	- Applied FISMA standards to enforce security controls, conduct risk assessments, and ensure compliance with federal cybersecurity requirements, protecting sensitive data and operations - Proficient in industry-standard cybersecurity management tools, overseeing the security of numerous contractor projects and ensuring adherence to procedures - Conducted detailed interviews with cross-functional teams to gather comprehensive requirements and understand their specific needs for a cybersecurity incident management tool - Developed a web tool to streamline the organization and accessibility of cybersecurity audits, incorporating feedback from various teams to enhance overall office efficiency and effectiveness - Completed training to ensure compliance with cybersecurity and classification standards during development						
	Cyber Security Engineer Intern - Cyber Security Integration Division					May '23 - Aug '23	
	- Obtained and maintained a TS/SCI security clearance - Applied proper government protocol for handling information in a secure facility - Adapted cybersecurity protocols to align with the latest revision of NIST SP 800-53, updating practices to meet new high standards and controls, and ensuring robust compliance with evolving security requirements - Conducted security testing to ensure essential cybersecurity features on a workforce essential registry - Collaborated with cross-functional teams to develop a comprehensive implementation plan with three recommended steps for migrating a commonly used cybersecurity framework from Excel to a secure database						
	Missouri S&T - <i>Mars Rover Design Team</i>					Rolla, MO	
	Chief Financial Officer (CFO)					Jun '24 - Present	
	- Led the Mars Rover Design Team to a 1st in the world finish at the 2025 University Rover Challenge against 114 international collegiate teams - Managed a \$60,000 operational budget, strategically optimizing resource allocation to maximize performance and ensure that all sub-teams met their full operational capabilities - Represented the team in professional engagements with potential sponsors, enhancing our partnership portfolio - Raised \$11,500 in 10 days during a crowdfunding campaign by strategizing outreach, leveraging sponsor networks, and driving donor engagement through targeted updates						
	Basestation Lead - Full Stack Systems Manager					Jun '23 - May '23	
	- Led a team of 15 developers, managing critical software projects, including integrating new hardware controls, automating system builds, optimizing development workflows, and improving software security, ensuring smooth communication and reliable performance of the Mars Rover's control systems - Utilized sub-moduled repositories to ensure clear development between systems via a custom network protocol - Developed and modified network protocols using UDP and TCP connections to meet system requirements						
	Technical Skills	Python Visual Studio Code	C++ GitKraken	HTML GitHub	CSS npm	TypeScript Yarn	ReactJS Docker
